PROFESSIONAL SUMMARY

DevOps/SRE engineer with 3 years of experience managing production Kubernetes clusters (GKE/EKS) and multi-cloud infrastructure on AWS and GCP for high-traffic platforms serving millions of users. Skilled in Terraform, CI/CD automation (GitHub Actions, Jenkins, Argo CD), observability (Prometheus, Grafana, Splunk, New Relic), and cloud-native platform engineering. Led AWS → GCP migration of 130+ microservices, improved deployment efficiency, reduced MTTR by 25%, and maintained 99.9%+ service availability. Currently pursuing an MSc in Data Science at the University of Roehampton, London.

WORK HISTORY

Platform Engineer (Contract)

Apr 2025 – Present

Aramark UK

London, UK

Client: Chessington World of Adventures Resort and Merlin Entertainments

- Managing cloud infrastructure and Kubernetes environments (GKE/EKS) while designing and optimising CI/CD pipelines and infrastructure automation (Terraform, GitHub Actions) — ensuring high availability, reliability, and improved deployment efficiency across environments.

DevOps Engineer

Jan 2024 – Jan 2025

Applied Cloud Computing (Client: Zee Entertainment Enterprises Ltd)

Bengaluru, India

- Led phased AWS → GCP migration of **130+ microservices** over 5–6 months using rolling deployments and traffic-shifting strategies — achieving near-zero downtime for critical streaming workloads serving millions of users.
- Managed production **GKE and EKS clusters (50–100+ nodes)** across multiple environments (dev, staging, production) — ensuring high availability, performing upgrades, enforcing RBAC/least-privilege access, and improving workload reliability.
- Optimised **8–12 CI/CD pipelines** (GitHub Actions / Jenkins) by parallelising build/test stages and standardising templates — reducing deployment time from **20–30 minutes to 10–15 minutes** (~30% improvement).
- Authored **Terraform modules** provisioning GCP infrastructure (VPC, IAM, GKE, Cloud SQL) — enabling secure, repeatable, environment-agnostic infrastructure at scale.
- Built observability stack (Prometheus, Grafana, Splunk, New Relic, AlertManager) across **50+ services** — reducing MTTR by ~**25%** and improving incident response.
- Implemented cloud cost optimisation strategies — reducing unnecessary resource usage by ~**25%**.

Site Reliability Engineer

Jun 2023 – Dec 2023

Randstad India Private Limited (Client: Zee Entertainment Enterprises Ltd)

Bengaluru, India

- Supported production GCP services and Kubernetes workloads (GKE) for a high-traffic platform — maintaining **99.9%+ availability SLOs** with SLI and error budget tracking.
- Reduced operational toil by ~**20%** by automating Kubernetes health checks, restart scripts, monitoring, alert routing, and scaling workflows.
- Enhanced monitoring and alerting (Splunk, New Relic) — improving incident detection and reducing alert fatigue.

- Resolved production incidents end-to-end — performing RCA, post-mortems, runbook creation, and improving MTTD/MTTR.

Subject Matter Expert (Freelance)

Chegg India Private Limited

Apr 2022 – May 2023

Remote

- Delivered high-quality computer science solutions covering algorithms, data structures, and systems concepts.
- Maintained strong quality ratings while working independently in a remote, deadline-driven environment.

CERTIFICATIONS

- **In Progress (Expected May 2026):** Google Cloud ACE , Microsoft Azure Fundamentals (AZ-900)
- **Planned (Q3 2026):** Certified Kubernetes Administrator (CKA), Terraform Associate

CORE SKILLS

- **Cloud Platforms:** GCP (GKE, Cloud SQL, Pub/Sub, IAM), AWS (EKS, EC2, S3, RDS, CloudFront), Azure
- **Containers & DevOps:** Kubernetes, Docker, Helm, Terraform, GitHub Actions, Jenkins, Argo CD, Ansible
- **Observability & Reliability:** Prometheus, Grafana, AlertManager, Splunk, New Relic, Coralogix, SLO/SLI, MTTD/MTTR
- **Security & Networking:** IAM, RBAC, Secret Managers, Istio, Anthos Service Mesh, Cloud CDN
- **Databases & Tools:** MySQL, PostgreSQL, MongoDB, Redis, DynamoDB, Python, Bash, Linux, Git

PROJECTS

InfraWatch — SRE Monitoring Platform

<https://manojpanduraj.com/>

- Built a production-style observability platform using Prometheus, Grafana, Loki, Promtail, Alertmanager, Slack, Docker, and GitHub Actions to monitor GCP VM infrastructure, local machine metrics, website uptime, Docker services, logs, and system health.
- Implemented **17+ alert rules**, **4 dashboards**, centralized logging with Loki/Promtail, and Slack firing/resolved notifications using Alertmanager for real-time incident response.
- Automated deployment using GitHub Actions and Docker Compose with GitHub as the source of truth; used SSH reverse tunneling to securely collect local MacBook metrics without exposing public ports.

3D Portfolio Website

<https://manojpanduraj.com/grafana/>

- Designed an immersive DevOps-themed 3D web experience hosted on GCP using Three.js, WebGL, Tailwind CSS, GSAP, and JavaScript with a custom 3D background and dynamic mouse-tracking particles.
- Optimised frontend performance using RequestAnimationFrame loops, hardware-accelerated animations, asset compression, lazy loading, and responsive 3D camera resize listeners.
- Built a glassmorphic UI and interactive Cloud Shell terminal experience to demonstrate DevOps concepts through high-performance frontend engineering.

EDUCATION

M.Sc in Data Science

University of Roehampton, London, United Kingdom

Jan 2025 – Present

B.Tech in Computer Science Engineering

Dayananda Sagar University, Bengaluru, India

Aug 2018 – Apr 2022
